### Understanding and Controlling motion

If you want to take your photography skills to the next level, learning how to control and manipulate motion is essential. With this technique, you can add drama and sophistication to your images and expand your creative capabilities.

Professional Photography

# COURSE OVERVIEW

## ABOUT OUR SERVICES

Are you looking to take your photography skills to the next level and gain valuable experience in a professional and student-centered environment? Look no further than our 20-hour photography course!

Designed to help students improve their photography skills, this course offers a hands-on learning experience with opportunities to test your skills within a choice of supported topic themes. You'll have the chance to work on live projects and collaborate with industry professionals, giving you a taste of what it's like to work in the field.

## What We Offer

### Comprehensive

20 Hours of Theory & Practical Training

### Experiential

Practical experience is crucial for gaining a comprehensive understanding of a subject and its real-world applications.

### Transformative.

Invest in your future and take your photography skills to the next level with our lighting techniques lesson.

## OUR EXPERT TRAINERS

Our expert instructors will provide you with personalized guidance and support throughout the course, ensuring that you have everything you need to succeed. Whether you're a beginner or an experienced photographer, this course is tailored to meet the needs of all skill levels.

Invest in yourself and your future by enrolling in our photography course today. With its focus on professional development and student-centered learning, you'll be well-equipped to succeed in the competitive world of photography. Don't miss out on this exciting opportunity to take your skills to the next level!

## ORGANIZE YOUR LEARNING WITH US

### Lesson 1

#### Introduction to Photography

In photography, you use a camera to capture images, which is an art that requires several skills. To start with, you need to understand the different types of cameras, lenses, and accessories available.

### Lesson 2

#### Mastering in Exposure

mastering exposure involves learning how to control aperture, shutter speed, and ISO to capture the image you want. Composition is important to create a visually appealing image, which includes understanding subject placement, framing, and use of lines, shapes, and colors.

### Lesson 3

#### Composition & Framing techniques

Learning composition help you to take better photos by creating visually appealing images. By understanding the rule of thirds, leading lines, and symmetry, you can create images that capture the viewer's attention and convey a message effectively.

Composition is an important aspect of photography, and mastering it help students to take photos that are more engaging and impactful.

### Lesson 4

#### Types of Camera and Lenses

In Session, We will look at different types of cameras used including SLR, DSLR, Mirror less, Point and Shoot etc. We also explore the most frequently used lenses and when and where they are used.

### Lesson 5

#### Basics of DSLR and its Functions

In this class, we'll look at all you need to know to understand your camera by looking at the common functions that appear on most cameras and demystify their use. Understanding these functions will expand your creative control and open up new possibilities for your images.

### Lesson 6

#### Understanding shutter Speed

One of the three most important settings in photography is Shutter Speed. Shutter speed is responsible for two particular things: changing the brightness of your photo, and creating dramatic effects by either freezing action or blurring motion. In this class , we will explain everything you need to know about it.

### Lesson 7

#### Understanding & controlling depth of field or focus area

This class will look at how you can control the depth of field by knowing and using Aperture. This affects how sharp/blurry the background will be in your frame. Use this to control whether you'll get a deep or shallow depth of field.

### Lesson 8

#### Understanding and using ISO

Understanding ISO and its uses in Photography is important as it can improve or ruin your Image. We will be looking through the various advantages and Disadvantages of ISO.

### Lesson 9

#### How much the light is enough ?

To fully understand how much light, you need to capture for a scene, you need a way of measuring how much light is there. Lesson 5 looks at the light meter and discusses how it can be used to understand your exposure, even before you have taken the picture and is essential to moving into Full Manual mode.

### Lesson 10

#### A in Studio Shoot

Following a set of lectures, In Studio Practical are given in order to ensure that complete understanding of each lesson is delivered and applied by the students. Each and Every Student will be able to practically shoot in a professional studio setup inside institute. This hand-on practical will make sure the students are perfectly trained to work in a studio atmosphere.
