## International Diploma in Environmental Management

### Who is this for?

Higher-level management is essential for providing guidance and recommendations regarding an organization's activities in relation to environmental impact. Learners are strongly encouraged to have already obtained a NEBOSH Environmental Management Certificate.

### Overview

The NEBOSH International Environmental Diploma is a professional-level qualification that equips practitioners with the necessary skills to manage environmental risks in the workplace. While there are no specific prerequisites, having prior certification in NEBOSH Environmental or General Certificate is beneficial. This diploma covers topics such as risk assessment, environmental law, and management systems. It is a degree-level qualification, demanding a background in health and safety or advanced study abilities. Obtaining this diploma enhances career prospects and demonstrates competence in environmental risk management.

# How is the COURSE ASSESSED?

The NEBOSH International Diploma in Environmental Management includes two units: Unit ED1 - 'Controlling Environmental Aspects' and Unit IDEM2 - 'Environmental Regulation'. The assessment methods for these units are designed to evaluate your understanding and application of environmental management principles.

1

## Unit ED1:

**Assessment Method:** Single Written Examination

This unit is assessed through a single written examination. It tests your knowledge and understanding of controlling environmental aspects, including the benefits, limitations, and structure of an environmental management system. Successful completion of this unit can contribute towards achieving the NEBOSH International Diploma in Environmental Management.

2

## Unit IDEM2:

**Assessment Method:** Workplace-Based Assignment

Unit IDEM2 focuses on environmental regulations. It is assessed through a workplace-based assignment. This assignment aims to evaluate your practical application of knowledge and understanding gained from Units ED1 and IDEM2. You will demonstrate your ability to apply environmental management concepts to real-world scenarios.

*Further details, including a full guide for the qualification, can be found here:  
[www.nebosh.org.uk/idem](http://www.nebosh.org.uk/idem)*

# WHAT DOES THE COURSE COVER?

---

The qualification encompasses the fundamentals of environmental management, international agreements concerning environmental protection, and strategies for pollution prevention and control.

The syllabus is thoughtfully crafted to equip learners with applicable expertise regardless of their global location. It empowers them to have a positive impact on environmental management standards and practices at all levels within an organization.

**This qualification covers key topics such as:**

- 01** Understanding the benefits, limitations, and structure of an environmental management system.
- 02** Identification and control of environmental aspects.
- 03** Principles and drivers for environmental sustainability.
- 04** Strategies for waste minimization
